This article is about the 2007 video game Soldier of Fortune: Payback for the PC, PlayStation 2, Xbox and Xbox 360. For Soldier of Fortune: Payback expansion pack, see Soldier of Fortune: Payback (2008) Soldier of Fortune: Payback is a first-person shooter/slasher-style game. It was released on October 20, 2007 by 3D Realms. The game was developed by Intervision Entertainment and is based on the video game Payback by Intervision Entertainment. Gameplay The game has three major missions, with the player being able to replay each mission over and over again, as well as going to several different locations, picking up several collectible items, and killing several different types of enemies. The objective of the game is to kill the four ninjas, one per mission. In order to accomplish this, players can find and shoot any enemies, and will then get an XP bonus. Each mission has different bonuses in addition to the number of enemies to kill: As the player progresses through the game, he/she will encounter loot boxes. These can contain weapons, armor and other various things. Each mission has a set number of these boxes to collect, as well as the number of the boxes left for the player to open. Once the player collects the required number of boxes, the mission is complete. The game has 3 difficulty settings (Easy, Normal and Hardcore). Each difficulty setting has their own set of bonuses. The difficulty setting has no effect on the number of enemies the player encounters, and the only bonus is more points in the XP-per-kill ratio. The setting does, however, make the game take longer to complete, and make a lot of the collectibles more difficult to find. Multiplayer The online multiplayer feature of this game is split into two sections, each accessible from their own set of button combinations. The first section allows the player to either join or create a game with up to 10 players. In this mode, the player can choose from a limited number of game types and weapons. Weapons are split into assault rifles, machine guns, shotguns and pistols. The second section of the multiplayer allows the player to enter a game hosted by one of their friends. When the player enters the game, his/her friends list appears. From here, they can select friends to play with. Gallery References External links Category:2007 video
