LearnPress - Nulled V-9.6.9.exe X64 / X32 Dvd Zip ( All Languages ) rarX. in order to match the conditions of this experiment. The difference in visual angle between the present experiment and the original experiment was much smaller than the difference between the present experiment and the previous study. The present experiment was run using an SONY®VEGA video recorder. While the original experiment used a NEC videotape recorder, and the previous study used a NEC U-HP DV tape recorder. All other conditions of the present experiment were the same as the original experiment. In this experiment, the experiment time was 20 min and the time was measured from the beginning of the data recording. It was confirmed that the recording time of this experiment was the same as that of the original experiment. The above reasons mean that the differences in experimental conditions and recording time were
