-You can define MACRO key commands to make a console easier to use. MACROs are written in the following format: [N];NMACRO [N] is the number of rows in the table [N]; is the key you want to be copied to the clipboard. For example, if I want to make copyNpad: [CTRL]Npad (ctrl is the keycode for numpad)Npad [N] is the number of rows in the table [N]; is the key you want to perform the MACRO on [MACRO] is the text you want to be copied to the clipboard. As you can see it's very easy to write macros for special functions. For more information: DEVELOPMENT not the person who wrote this, any suggestions or help are appreciated, please do not make the developers life a misery version 1.0.0.1 version
