DedupeExpress is a multifunctional tool that allows you to compare the records, allowing you to detect and identify the similar ones. You can quickly find the duplicate records and remove them from the database. This will increase the information quality and save the space on the disk. You can use this tool to eliminate the duplicates from the data types, including files, text, emails and other information. The software runs from within Visual FoxPro, Excel, Access, Oracle, SQL Server, MS Dynamics, or any other software that can communicate with the database. The tool allows you to compare the selected data types and compare multiple records for each individual one. This software is built to serve several useful purposes. Precautions: You need to be careful with this application. In order to fully exploit the utility of the software, you need to be an expert in programming, especially in Visual FoxPro. For the Microsoft Office products, you need to run the software while logged in as an Administrator in order to activate the Data Processor function. NOTE: In order to use the selected computer for the purpose of browsing, you need to install the software on your machine. Information: The software is included in the free trial version of Visual FoxPro. You need to download the software and install it on your computer, for using the software. Download DedupeExpress v7.0 Visual FoxPro 6.0 and Visual FoxPro 6.5; Microsoft Access 2000 and 2003; MS Excel 97 and 2000; MS SQL Server 2000 and 2005; MS Dynamics 2000 and 2005; Oracle 7 and 2000; SalexLogix Software Developer's Kit 9.0.1; Salesforce 1.2, 1.3 and 1.4 You can't change the subject on this article DedupeExpress has been downloaded 54 times. At the time of downloading DedupeExpress was last updated on 2017-08-22. Available for download from the publisher's website Details Keyfeatures This unique piece of software helps you to reduce the chances of overwriting or deleting the existing data. This application provides the options to perform multiple backup and restore sessions of the selected database. The software has a special session feature, which allows you to create and run multiple sessions on the selected data at the same time. DedupeExpress is easy to use and offers the functionality of other software. This tool provides a set of features that 70238732e0

No virus was found.Identification of microRNAs in a single cell by microfluidic chip-based high throughput cell sorting. MicroRNAs (miRNAs) are a class of short non-coding RNAs (ncRNAs)

that play essential roles in various biological processes. Cell-specific profiling of miRNAs in whole tissues or cells is crucial to elucidating the functions of miRNAs in specific cells. Here we develop a microfluidic chip-based high throughput single cell sorting (CS-HTS) system for the simultaneous isolation of multiple single cells and profiling of their miRNAs. By combining laser-mediated cell ablation and microfluidic-based single cell manipulation, we can accurately isolate multiple single cells from the same sample within 5 min. We then profile the miRNA expression in single cells, which could be the basis for future single cell RNAseq studies. We have demonstrated the system's functionality using several cancer cell lines, including a neuroblastoma cell line (D
