Download it for free and let me know what you think about it and if you like it. A: If you go here and download the 32-bit version of the relaed installer, you should be fine. The reason it's 32-bit only is that it's not 64-bit compatible and that's why the game, as it's only designed to run in 32-bit. If you want 64-bit compatibility, you'll need to either use the original installer or use this one. Q: TypeError: unsupported operand type(s) for /: 'list' and 'list' I'm getting the error TypeError: unsupported operand type(s) for /: 'list' and 'list' after running the code below. I tried running the code again but still get the same error. import datetime import time num_sub = 3 def Get_time(end_date): # Calculate the time between the two dates time_start = end_date - datetime.datetime.now() time_interval = end_date - time_start return time_interval sub_list = [0,1,2,3,4,5,6,7,8,9] days = [Get_time(start) for i, start in enumerate(sub_list) for sub in range(num_sub)] print days print(type(days)) A: The problem is that you are using enumerate which returns a list of tuples. So, that would look like this: days = [2d92ce491b
