Category:Technical drawing publications Category:British Standards Category:Standards of the United KingdomA rainbow appeared over Lake Ontario as part of a beautiful natural phenomenon that swept over the Great Lakes this weekend. The rainbow appeared over the lake on Sunday, but was more visible on the Huron side of the lake, according to photographer Mitch Shaw. "It's an optical illusion. If you look at the reflection of the rainbow in the still water of the lake, it disappears," he said. No rainbows were reported around the city of Toronto, but a rainbow appeared above the downtown skyline. "The weather here in Toronto was cloudy and overcast," Shaw said. "It was more of a halo effect. The light shining through the clouds was all blue and green." "The weather here in Toronto was cloudy and overcast," Shaw said. "It was more of a halo effect. The light shining through the clouds was all blue and green." Shaw took this picture of the rainbow in the sky above Toronto. (Mitch Shaw) People are welcome to share their photos of the rainbow on Twitter with the hashtag #torontorainbow.Q: How to get the same session variables in two mvc3 pages? I have a application with mvc3 and I have two pages that has been put together to handle actions in a single page. One of the pages that is associated with a particular view takes a parameter, which is a session variable, to determine what to show. Is 2d92ce491b
