Tremblay, R. Manohar. - Free book download as PDF File (.pdf) or read .Q: Why does setting the visiblity of a form change the visibility of the form's parent container? I have a ContentPlaceHolder on my page and a Form within it. When I set the visibility of the form to Visible, it causes the parent ContentPlaceHolder to display as Visible as well. Why is this? A: ContentPlaceHolder is not really a control. When you hide a control, its form is hidden as well. If you want to affect the visibility of your ContentPlaceHolder when you hide your form, you have to do this in your code-behind. The present invention relates to a new and distinct cultivar of Hydrangea plant, botanically known as Hydrangea macrophylla 'Burgundy Splash' and will be referred 2d92ce491b
