Dolphin Memory Card Issues Gamecube GameCube Memory Card Dolphin Playing GameCube Game on Dolphin Sep 23, 2019 Dolphin 10.2.0 - Switching to the.raw file on the memory card of Dolphin can no longer save games. So the solution is not to use a memory card at all if you don't need it. If you do use a memory card, get it to a . I want to check it with a Google Drive on Dolphin, is it possible? I can't find "Google Drive" config menu in Dolphin's "Config" menu. Sep 22, 2019 Dolphin 10.1.4 and memory cards - Load and save individual games to memory cards. Gamecube Memory Card Dolphin Aug 27, 2018 Dolphin Gamecube Memory Card Problem. So I've been playing through Paper Mario: TTYD on Dolphin and it's been working just fine. . So I found my GC memory card with my Animal Crossing and I really want to use it on Dolphin on my computer. Any way to do this as easily as possible? A: You can save memory card's.raw files to your drive and use.raw files as default save path in dolphin. To do so, you should: Configure Dolphin to save memory cards (i.e. the memory cards will be used only for saves) by choosing "Gamecube" as device in the Dolphin's "Config" menu. Then you will be able to access your game on your drive from the menu "Legacy Load and save". "Legacy Load and save" is not found out of the box in the menu. You need to add "Legacy Load and save" on the Dolphin's "Config" menu. The menu is accessed by pressing Ctrl-M Make sure you have the latest version of Dolphin. It may be that the memory card does not have any saves. In that case you will have to update your saves, otherwise you will not be able to save anything on your drive. The "memory card" you speak of here is the PBR or NAND memory on the GameCube. You can check whether you have nand games, or pbr games in Dolphin by pressing F3. Note that your saves that you have on memory card will not be migrated there, therefore if you have existing saves, you will not be able to use those on your drive.
