A: It's the driver that came with the scanner. You're trying to install it manually and the pack is only for windows 7 and windows 8 - so it's not going to work. Most scanners just work automatically and you don't need to install drivers. Also, if it's still under warranty, try to contact the seller and ask them if they have a recovery disk or USB key that can be used to fix the problem. Q: iPhone Type-Security Questions Currently developing an iPhone App and I would like to know how to do the following: What is the minimum hardware requirements for a user to be able to download the.app? What about the.app's signature? For normal applications, what is the security level of.app files that are downloaded from the app store? Is there any way for an App store developer to get a hacked.app (iOS)? Or will the app store always be for "safe" apps? What are the security requirements for App store Apps (native)? Any other security issues I should be aware of with dealing with.app files? P.S. I'm not talking about jailbreaking the iPhone/iTouch here. I am talking about an "App" that is downloaded from the app store (unsure of the security level at the time of the download). A:
