We report a case of a 32-year-old woman with von Recklinghausen's disease and multiple endocrine neoplasia type 2A. The clinical manifestations in our patient with von Recklinghausen's disease were neurological abnormalities in the form of cerebellar ataxia, myoclonus and nystagmus. She had clinically reduced visual acuity and ophthalmoplegia. The diagnosis of multiple endocrine neoplasia type 2A was made based on the presence of clinical and biochemical evidence of hypersecretion of growth hormones, hypothyroidism, and acanthosis nigricans. She also presented with a giant fibrous tumor of the tongue. The patient's neurological condition improved after a laryngeal suspension operation.Highly Efficient and Passivated P-Type (H2O)n-Pd/TiO2 Electrodes for Polymer Solar Cells with High Fill Factor and Low Voc. A cheap and high-yield method for the fabrication of p-type Pd-based perovskite/TiO2-based electrodes is reported. In contrast to the conventional Pd/TiO2 cathode where both the TiO2 and Pd layers are deposited on the

substrate, the substrate is placed upside down during the sputtering and electrodeposition of Pd. The TiO<sub>2</sub> layer is then used as a diffusion barrier. Notably, this monolayer passivated electrode exhibits an acceptor level below 0 eV and achieves a photocurrent density of 7.1 mA cm<sup>-2</sup> with an open-circuit voltage of 0.82 V, resulting in a fill factor of 0.69 and a power conversion efficiency of 1.06%. Owing to its low work function of ~4.3 eV, this passivated P-type electrode is highly suitable for efficient P3HT:PCBM device.

Q: Clickable buttons in android I have added 6 EditText fields in my application. When the application is run, I need to give the user the ability to click on any of these fields and start typing in them. I am not sure if i need to use edittext field in my application or I need to some kind of custom buttons (which can be clickable) to achieve my goal. Any idea or suggestion
