Hi, to perform this task a little, so I started reading these websites (questions about this problem in these forums): But, as I said, my problem is that I need a tool to perform this task faster and easier.

A: If you are looking for a way to "fix" a corrupted.exe, you're going to be disappointed..EXEs, which are just the "compiled code" of an application, are quite binary, and can be very difficult to repair. The only reason that the "exes" we have around for a lot of things like this are corrupted is that the developer built it and then lost control of it. If you can get your hands on the original install file, you may be able to simply re-install it. But I would suggest just getting a new.exe for whatever it is you want it to do.
