# What's New In Online Wallpaper?

InternetWallpaper is an application that makes your wallpaper "talk to you" Set the length of time that your background image will remain the same Change the wallpaper during the set time if you feel like it The settings you set in the program allow you to quickly change the background image on your computer InternetWallpaper Description: Application converts your desktop background into a video player. User-friendly interface that allows you to easily select a background, set the duration of the video, change the width and the height, and produce a video with your chosen background. When you change your desktop background by choosing a different wallpaper, InternetWallpaper begins displaying the video player. Configuration: When installing InternetWallpaper, you will be prompted to enter your new wallpaper settings. When a slideshow with your wallpaper starts, you can select the desired duration of a video. Control Panel to modify the wallpaper settings. When using your computer without InternetWallpaper, it will simply be as if your desktop wallpaper was a video player without any real effects. User Review: System Requirements: It works on: Windows 7 and Windows 8 (32/64 bit) Freezing Walls is a stylish concept that uses the graphics abilities of your computer to create a dynamic desktop background. When you set up your wallpaper image, you will be presented with a video player that you can use to control the animation of your screen background. This unique wallpaper application will work perfectly on low-end computers too. Freezing Walls Description: Application consists of a video player and a panel of settings with the ability to configure everything. There is a dedicated window that automatically covers your desktop with your selected video image and a player that provides you with the opportunity to control the duration of the video and change the size of the picture. There is no need for you to be concerned about unwanted popups or blocking websites. You can also configure the audio that plays with the video to allow it to transition smoothly from one background to another. Freezing Walls works great even on low-end computers Easy-to-use interface allows you to quickly find a background that you like and control all the video options. Configuration: When you run the program, you will be presented with the main window which consists of three sections – the background panel, the settings and the video
