We studied a family with nonprogressive frontotemporal dementia (FTD) linked to chromosome 17 in which two siblings were affected. At examination both had generalized parkinsonism, myoclonus and had pseudobulbar dysarthria. Post mortem examination of the younger of the two revealed mild atrophy of the frontal and parietal cortices, and neurofibrillary tangles in the frontal and temporal lobes. We identified two novel mutations in the S-100beta gene on chromosome 17 (1189G-->A and 220G-->A).Q: OpenGL ES shader uv coordinates and per vertex normal I'm following a book and I'm trying to understand the openGL settings for textures. First, I have 4 vertices, each connected by 4 texture coordinates. Each vertex has its own normal. Then I want 4 textures each one with the same uv coordinates. So the lower left corner is (1, 1) and the top right corner is (4, 4) for the uv coordinate. I tried the following code but it doesn't work. The quads are being joined together in the wrong order. Any ideas? // vertex positions glVertexAttribPointer(4, 3, GL\_FLOAT, GL\_FALSE, 0, (void\*) 0); glEnableVertexAttribArray(4); glVertexAttribPointer(5, 3, GL\_FLOAT, GL\_FALSE, 0, (void\*) (4 \* sizeof(GLfloat))); glEnableVertexAttribArray(5); // texture coordinates glVertexAttribPointer(0, 2, GL\_FLOAT, GL\_FALSE, 0, (void\*) (12 \* sizeof(GLfloat))); glEnableVertexAttribArray(0); glVertexAttribPointer(1, 2 570a42141b
