A: As far as I understand you want to get the date from the line: Start date: 2018-05-09 19:42:29 Then you can do that with the following code: From e.g. the line: DateTime t = DateTime.ParseExact(tDate, "yyyy-MM-dd", null); Get the string from the tDate variable var dat = tDate.Substring(8, 4); // To get "18" The Substring is useful here as it will give you the values you need and remove the unwanted text that may be there. But the line: e.Time = t; Does not make any sense to me, but let's take a look at how it is used: From e.Time = t;

[image] vectorworksserialnumbercrack15 - DOWNLOAD Hello, are you looking for the right serial number for your license? I know how annoying it is to get a license for a software and then the price tag is too high. It is not that we did not trust you we just want to make sure you do not forget to download the serial number. If this is the case, please do not hesitate to contact me. I will do the rest for you. I used to be able to create serial numbers with Photoshop but my license expired and when I installed an update to Photoshop CS6 it kept my serial number. If you need more information, please let me know. vectorworksserialnumbercrack15 Nov 25, 2015 retinzu, 29 January, 2022 @ 2:48 pm.
