
Gmh2 Maya Hair Script Download ((LINK)) 17

[Download](#)

In the last update of GMH2, there was a bug that caused the user to no longer be able to select components such as faces, edges, and vertices. I fixed it... But with some others. Specifically, I fixed the problem in what I fixed in the latest Mesh updates, where the user tried to enter elements through the "Edit" menu, but can't do it because the program can't find "mesh". So I fixed that problem. I also fixed the bug in that you can't edit files that are in the same folder as the Mesh, as I fixed this in the latest GMH2 updates
