With Neutron 3 Advanced, you can combine all of these tools into one powerful package. Three Types of Channels Only the cream of the crop can call themselves mixing pros. Mixing is a craft. It's about bringing your vision to life. More channels are better. Usually, you're given 24 unique channels to work with. The later version of Neutron has no fewer than 32. That's more than twice the number of channels you'd expect in a modern mixing application. And it means you can be more precise and intuitive in your work. WIPE - Wash without "wiping" the channel. Silence your ADR, everything from Foley to chat. Create a beautiful soundtrack with just the right amount of ambience, and truly evoke emotion in your audience. Mix your noise-canceling headphones. No limiting. iZotope's new feature-packed environment lets you work on as many as eight different tracks at once. These are the sweetest 20 channels in Audio: Sparkle. Crystal. Spark-filled. iZotope Spark features a unique "shine knob" that lets you turn up the spotlight and make the sound pop in any mix. Flashlight. Definition. iZotope Definition turns any track into a beautiful sound that tells a story. Faster. Faster. iZotope Rising lets you turn up the speed on any track for a modern burst of energy. Well.
