OneLoupe is a free magnifying screen magnification utility. One feature of this software is its ability to enhance the view of a video. Magnify and enhance any video and it automatically recognizes your screen and size, creating an ideal picture enhancement system for your computer's screen. You May Also Like: Rightclick-Click: To enable rightclick-click on your mouse, go to your mouse settings and select the option called "Enable right-click". Doubleclick-Drag: To enable doubleclick-drag, go to your mouse settings and select the option called "Enable doubleclick-drag". Anti-Click: Go to your mouse settings and select the option called "Enable anti-click". OneLoupe 1.29 5 16 reviews A practical solution At its core, the program's scope is simple: to magnify an area of your choosing on your screen. To that end, the program is user-friendly and easy to configure, which makes it accessible to anyone. It requires no installation: simply unpack the archive it comes in, then boot it up. The program will then sit in the tray, ready to be used whenever you require. Launching the magnifier can be done by clicking the app's icon in the tray, or via a hotkey: the default is Win + Esc, but you can modify that to something more comfortable for you. When in the magnifier, users can increase the level of magnification by pressing Ctrl and using the mouse wheel. The program also supports multi-monitor setup, which means that users can take advantage of the magnifier on all of their screens. There's a Normal and Real-time mode for the magnification, and they work a little different from one another. Normal simply takes one screenshot and enlarges it, whilst Real-time takes multiple screenshots. In our case, the former seemed much more precise and convenient to use. OneLoupe is easy-to-use, is free, and does what it sets out to do. There's no reason not to try it if its functions are of interest to you. User Comments Hi, I've installed your software. Do I need to purchase something to get the menu option to "change magnification"? I can't seem to find it. Am I doing something wrong? Reply by Cat on Jan 12, 2019 at 6:35PM Hi,

Copy a Selected Area from Your Screen (Mouse 2) Create a Left-Right Flip of the Screen Create a Flip of the Screen with the Selected Area Copy an Area of the Screen Create an Elliptical Area of the Screen Create an Oval Area of the Screen Copy a Selected Area Create a Left-Right Flip Create a Flip of the Screen with the Selected Area Copy an Area of the Screen Create an Elliptical Area of the Screen Create an Oval Area of the Screen Copy a Selected Area Create a Left-Right Flip Create a Flip of the Screen with the Selected Area Copy an Area of the Screen Create an Elliptical Area of the Screen Create an Oval Area of the Screen Conclusion I hope you enjoyed my review, thank you for reading. OneLoupe is a magnifier which analyzes the displayed contents of your screen and magnifies them. It works in real-time, so you can easily change the magnification by sliding your mouse pointer over the screen and pressing CTRL. You can also zoom in or out with your mouse wheel. Highlights: - Detects the position of the displayed contents. - Finds areas of interest on your screen. - Magnifies the areas of interest. - Places a customizable icon in the notification area. - Adjusts the magnification by adjusting the size of the region of interest. - Adjusts the minimum and maximum zoom level. - Adjusts the brightness of the displayed contents. - Works on multi-monitor setups. - Highlight colors can be changed. - The icons for the notification area can be changed. - Works for 32 and 64 bit versions of Windows 7 and Windows 8. - Highlight Colors can be changed in the options. - Supports Windows 7 and 8. - Compatible with multi-monitor setups. - Works on Windows XP. - It is Free to use and has no annoying advertisements. Download: License: published:13 Aug 2017 views:619 I use the windows 10 task manager to take screenshots, but sometimes they are not detailed enough. After many research, i found out that with screenshot app, there will be a list of options on the screenshot itself. Like, if a person took a screenshot with a resolution of 1080, then one can view other options like no black bars, hidden gadgets, hidden software, etc. Now, I'm going to explain the options, I found at the bottom of the screenshot.

----- 1. Resolution 2. Theme 3. Picture options 4. Black Bar 5. Floating 6. No Black Bar 7. Hidden Software 8. Hidden Gadgets

----- Like, there are many more options, but these are the important options to view. Resolution, I can't view, but there is information about that option. Theme, there are many themes
