More and more people want to have a unique picture, unlike any before. These days, it is a trend to have a collection of amazing pictures, especially with the use of Google Photos. Start with your photos: Start editing the

photos you want to edit. If you have the best ones, you are ready for the editing of the remaining ones. Let's begin with the number one: Lighting. Lighting in your photos is not always the best. If you take it seriously, you can make the photo look like a professional product. The light should be as bright as possible, and the color is not good. After you have a high-quality photo, you can add more lighting if you want to do something special. Let's move to the left side of the screen. Light brings the image. You can add a shadow effect, some light or dark points. These are some ways
