Autocad 2008 Portable Autocad Portable:  
Microsoft Windows Autocad 2008 Portable  
is a compact CAD application that offers  
many advanced drawing tools in a  
workspace that is easy to use. Autocad  
portable However it doesn't allow me to  
work in both 2d and 3d. I tried to change  
the page orientation via the option settings  
toolbars - " preferences " - " page setup " -  
" Page orientation " - " Laptop ", by  
changing " page size " to " Portrait " But  
this is not working. I need it to look like in  
this picture: I want to be able to see the  
drawing in two orientation, so that in 2d it  
will be similar to the picture I attached ( on  
the right side), but when I insert it in 3d, it

---

has to look like this (in the left side): A:  
You can use some tricks to achieve this.  
Open a new drawing and choose the "Page  
Setup" option Choose the "Page  
orientation" tab Select "Laptop" or  
"Portrait" for the "Page size" option A:

What you want is not possible. There is  
only one orientation per page for autocad.

You will have to display the drawings  
multiple times in multiple windows in order  
to display them in a different layout. Q: Is

there a parametrized counterpart to  
jQuery.each()? I have an array or object  
that is used with jQuery.each(). I'm

wondering if there is a way to create a  
function that will iterate an arbitrary object  
and return the results as a single object or  
array, all in one line. In other words, to get

the output of this: `jQuery.each(obj,  
function(i, item) { var cssClass = 'class' +  
item.cssClassName; $('#' +  
cssClass).click(function() { var s = "" ; //  
whatever...`
