What's more, the application can also recover videos from iOS 10 devices, including your iPhone, iPad, and iPod touch, regardless of the iOS version. We've added

What's New in the TogetherShare iPhone Data Recovery?

It's important to keep your data from your iOS device safe, although there have been cases when photos or messages have been deleted by accident. Sometimes, you may even wish to recover files that you purposefully deleted, thinking that you wouldn't ever need them again. The solution isn't to stop deleting items and clutter your phone with useless content, but to find a tool that could help you recover lost data. TogetherShare iPhone Data Recovery is one possible candidate. Easily recover your iOS data If your device is connected to your computer, TogetherShare iPhone Data Recovery will detect it automatically. The application works with both iPhones and iPads, as long as they run iOS 10 or later. You can choose between recovering data directly from your device or from an iTunes backup file. The next step is to allow the program to scan your device (or backup) for files. All the contents of your phone will be displayed in the app's interface; in order to see only the "lost" files, simply check the "Only display deleted" option. What can you restore? TogetherShare iPhone Data Recovery has many categories of data that you can try to recover. Among these are photos and videos, voice memos, messages, contacts, or even your call history. You can also recover notes, bookmarks, reminders and calendar events. After you select what you need, simply click Recover and allow the program to do its thing. If you don't find what you're looking for, then those files have probably been deleted too long ago. With a user-friendly interface, TogetherShare iPhone Data Recovery is a tool like many others out there, that doesn't stand out. If you

need to recover stuff from your iPhone, you're bound to find better programs at a better price, or even free of charge. With this iOS application, you can view all the files on your phone's SD card, and recover lost files. It allows you to export photos, videos, contacts, calendar events, and notes to your computer. You will find it rather simple to use the application. The app gives you a list of all the files on your SD card. To view a particular file, simply double click on it. In order to export the file, click the corresponding icon. The app offers many features. It is very easy to view the directory contents, so you can check if you have all the files you want to recover. It is also possible to export all the files at once. Features: - See the files on your SD card - View all the directories and files - View the files by type - Export the files to your computer
