**Backup VB.net Projects Full Screenshot: Why you should use it?** VBS to VB.NET.Net is not supported by Visual Studio anymore. We recommend users to use Rich Text Format to convert rich text. You can also backup the rich text content with a clean and nice report file. For one who are working with Visual Basic and want to convert their Visual Basic project into .Net project, you need to backup all your Visual Basic project into Visual Studio format. In order to convert the Visual Basic project into Visual Studio project, you need to re-install Visual Studio and you need to wait that your Visual Studio has been converted into Visual Studio .Net project. It will take a long time to convert a Visual Basic project into Visual Studio project. Thus, you may decide to use VBS to VB.Net project to convert your Visual Basic project into .Net project.
