With browser-based apps, installation is often a headache, but with Fast Browser Pro you don't have to think about it. Just choose one of many pre-configured Windows browsers and launch it from any directory. When you want to start browsing the Internet, click on the Fast Browser Pro icon from Windows taskbar and you're done. Fast Browser Pro is a fast, simple and highly customizable browser which will be especially valuable if you're an Internet user that is not too demanding and does not have a heavy workload. Overall: 4 Design: 4 Features: 3 Functionality: 4 Value for money: 3 by gwrose Date:01/14/2010 Pros No need to go to complicated setup process, easy to use, some features can be added Cons Empty update history, slow browsing Bottom Line Fast Browser Pro is one of the simplest and the most straightforward browser-based software available on the market. What's not to like about it? Not a lot, actually. It is highly customizable, has an easy to use interface, and it is also one of the fastest browsers out there. We loved the fact that Fast Browser Pro does not need any complicated setup process and that there are many options and tools which can be added. There are also options to add extra

tools like an RSS feed reader or instant messaging service. There is also an option to add some extra features such as security settings, form submission and navigation tools. Fast Browser Pro can also be customized with themes, fonts and colors, making it a great choice for simple browsing. The only problem we had with the app is that it does not provide any kind of update history, which is a little disappointing. Overall: 4 Design: 4 Features: 4 Functionality: 4 Value for money: 4 by jeev Date:03/02/2010 Pros Simple, clean, easy to use, lots of options Cons N/A Bottom Line Fast Browser Pro is a simple and clean browser that makes browsing the internet a breeze. You have the ability to launch it from the Windows taskbar and navigate to any website with ease. You can choose from several pre-configured browsers or choose to create your own. The application

What's New In Fast Browser Pro?

Fast Browser Pro is an Internet browser based on IE6 engine, fully compatible with all known web browsers. It is as simple as any other application of the same name and it's not a miracle. However, the developer went to great lengths to make it a very practical application that can be used easily, in a secure way and with decent performance.

Fast Browser Pro is not an Internet explorer, it's a browser based on IE6 engine. From the homepage, you'll see 3 items at the bottom: Library, Search and More. Library is a storage location that you can save and access all of your bookmarks in a simple and fast manner. When you click on the "Library" button, the application adds a "bookmark" folder to the main "My Favorites" storage. The buttons in the top left corner allow you to navigate through your bookmarks. If you click on a bookmark, you'll be redirected to that website and it's pages. Search is a special feature that allows you to use the most popular search engines (Google, Yahoo, Bing and so on) in order to find what you need. More is the home screen, a main window with all of the pages and functions of Fast Browser Pro. Screenshots: What's New in this Version: * HTML Page help has been added to the About Fast Browser Pro window * Credentials window has been added to the Help Fast Browser Pro window * Quick Links and other functions have been added to the Tool Bar * A crash-log has been added to the Help Fast Browser Pro window * Can be run as a Java applet as well as stand-alone * Windows 8 and RT support * Cookies can now be deleted from a chosen site * Table of contents has been added to the bookmarks list * New languages have been added * Tab navigation has been added to all windows * Complete

accessibility has been added to the "About Fast Browser Pro" window * New settings dialog has been added * Auto-close feature has been added * Location bar has been added to the tool bar * Display Settings have been added to the tool bar * Refresh button added to the tool bar * Complete Help has been added to the tool bar * Complete Help has been added to the Help Fast Browser Pro window * Sitemap has been added to the Help Fast Browser Pro window * Tool bar has been optimized * Page has been optimized * Improved Performance * Disabled support for Windows Vista and 7 * Firefox and Chrome sites will no longer be listed
