SmartKiller MiniRemoval is an advanced antivirus program developed to delete and remove the CoolWWWSearch worm. It is very simple to use by individuals with no experience in antivirus programs, as it fully automatizes the scanning and removing operation. The CoolWWWSearch virus (v1/v2) is a fast growing and notorious malware, found in the wild for more than a year. This potentially hazardous threat changes the homepage and generates pop-up ads in the infected system, so it does not require a system reboot. The malware causes an increased demand on computer resources and weakens the overall system performance, but does not affect other programs. As installation is not a prerequisite, you can drop the executable file somewhere on the hard disk and click it to run. You can also move the antivirus program to a USB flash drive or similar removable device, and run it on any infected workstation without prior installers. What's important to keep in mind is that SmartKiller MiniRemoval does not add new entries to the Windows Registry, Start menu, or any other part of the disk. A standard file deletion is enough to eliminate it. At initialization, the utility automatically performs the scan task and eliminates CoolWWWSearch's components on sight, so user assistance is not required. It runs on a very low quantity of CPU and RAM, and quickly carries out a task, without hanging, crashing or showing error dialogs. FAQ: · Can I use SmartKiller MiniRemoval without a problem? Answer: Yes, you can, it won't cause any problems to your system. · I do not see any virus in my system, why do I need to use antivirus? Answer: If you don't see a virus in your system, then you don't need to use a antivirus. · Will it harm my PC if I run it? Answer: Yes, it may harm your PC. · Will it remove my virus if I have it? Answer: Yes, it will remove your virus. · Can I use it on more than one PC? Answer: Yes, you can. · How to remove it? Answer: It is very simple to use by individuals with no experience in antivirus programs, as it fully automatizes the scanning and removing operation. It will automatically scan the PC to find and delete all the infections. · How can I access my

What's New in the CoolWWWSearch SmartKiller MiniRemoval?

SmartKiller MiniRemoval is a small and portable application designed to remove the CoolWWWSearch virus, also known as CoolWebSearch. It is very simple to use by individuals with no experience in antivirus programs, as it fully automatizes the scanning and removing operation. The CoolWWWSearch infects web browsers, such as Internet Explorer, Firefox and Chrome, changes the homepage and generates pop-up ads.
